Tech Notes

Relay server: Re-streaming

NVR works as a re-streaming server that registers FlexWATCH® IP cameras and other 3rd party ONVIF IP Cameras and re-transmits the Video streams up to 4 concurrent streams to other various client software or NVRs.

I Frame Recording

It records only "I picture" at each GOP and discards "B picture" and "P picture". "I frame recording mode" at IP surveillance system is an alternative method to support the pre-post alarm recording function of DVR system.
